Rep. Ohnstad Disappointed Republicans Refused Common-Sense Changes to Foxconn Deal

Madison – Rep. Tod Ohnstad (D – Kenosha) issued the following statement today following a Jobs and the Economy Committee vote on Gov. Walker’s proposed Foxconn deal:

“I was disappointed that Republicans refused to vote for any of the amendments Democrats brought forward today. These were common-sense changes that would have given greater protections to taxpayers, better assurances that these state-funded jobs would have gone to Wisconsin workers and contractors, and would have provided needed protections for our environment.”

“In order for this deal to deliver on the promises made by Republicans, we need to work together. Instead, Republicans pushed through a single package of changes that failed to fully address our concerns.

If Republicans are truly interested in a bi-partisan vote on this project, they should take a deep breath, slow down and address the concerns of Wisconsin families across the state.”
